

SPECIAL RETAIL PROJECTS

In today's competitive retail and e-commerce markets, shippers find themselves in a battle to balance longer supply cycles with abbreviated and demanding sales cycles. Concerns over historically inflated costs of keeping product on shelves have shifted to calculating the cost of having product out-of-stock (or absent from store shelves).

Saia LTL Freight and LinkEx can add resiliency and flexibility to your shipping operations, helping you overcome these supply chain challenges.

- **Special projects**
- **Seasonal product rollouts**
- **Reverse logistics**
- **Spot quote for heavy weight shipments**

- **Warehouse and Fulfillment:** Long-term and pop-up options help accelerate sales velocity and inventory visibility
- **Domestic Expedited:** Air and ground options are designed to maximize agility and prevent disruptions
- **Transloading:** Avoid demurrage and detention by converting your ocean freight for faster inland delivery
- **International Air Freight:** Keep your product on shelves by avoiding delays caused by recent global port closures
- **Pool Distribution:** Increase your speed to market, reduce linehaul costs and "go green" by reducing your carbon footprint
- **Truckload:** Consolidating multiple shipments into a single truck is a proven strategy for large retail rollouts, new store openings and store re-sets/refurbishments
